VANDIS

Azure Infrastructure Quick Start by Vandis

Get your secure, scalable Azure infrastructure up and running in as quickly as two weeks.

What is Azure Infrastructure Quick Start?

Vandis has built this offering to overcome the challenges organizations face when connecting, securing, and scaling their Azure environment. Our process gives you the ability to quickly deploy an Azure environment that meets best practices. Vandis will build your Azure landing zone with added security through North-South and East-West traffic inspection. Our architecture will enable you to easily scale within your current region or expand to additional regions.

After a Quick Start planning session, Vandis can quickly deploy your infrastructure through our templated architecture to provide your organization with a next generation, highly-available infrastructure.

Why customers use Azure Infrastructure Quick Start

- Deploy an Azure infrastructure in weeks rather than months

- Ability to quickly add additional regions with a templated infrastructure

- Begin a digital transformation in Azure by creating a secure landing zone that follows Microsoft Best Practices

Significantly Reduce Deployment Time

- Cloud infrastructure deployed through use of templated, validated architecture
- Quickly deploy an Azure Landing Zone that leverages micro-segmentation and traffic inspection

Deploy in weeks instead of months

Easily Scale to Your Business Needs

- Scale within your existing region or into additional regions
- Create an autoscaling firewall inspection zone per region
- Increase global network presence with seamless connectivity into Azure Hybrid Infrastructure

Improved flexibility and scalability

Optimized Infrastructure that Meets Trusted Standards

- Azure deployment built to meet Microsoft's Best Practices
- Utilize best practices with RBAC and Infrastructure as a code
- Checked against regulatory and compliance guidelines

Proven infrastructure design

"Launching a cloud environment that aligns to best practices with proper governance and role-based access control allows organizations to quickly and safely realize the benefits of a secure cloud infrastructure."

- Ryan Young, CTO, Vandis

What do you get with your Azure Quick Start from Vandis?

Offer Deliverables

- Can set up initial subscription for new Azure customers
- Set up Landing Zone with Management Virtual Net
- Load balanced pair of next-generation firewalls for traffic inspection
- Proper RBAC and cloud security posture
- Up to 3 additional use-case Virtual Networks

Optional Deliverables

- Terraform deployment of resources
- Alignment with centralized firewall management where applicable
- Day 2 Managed Service Support

Vandis' Azure Infrastructure Quick Start

Our promise to you

We can significantly reduce deployment time while leveraging Microsoft's best practices to build a secure, reliable infrastructure that supports your enterprise goals

A package to get your company started on its Digital Transformation

Turnkey, production-ready environment that meets best practices and modernizes your Azure infrastructure
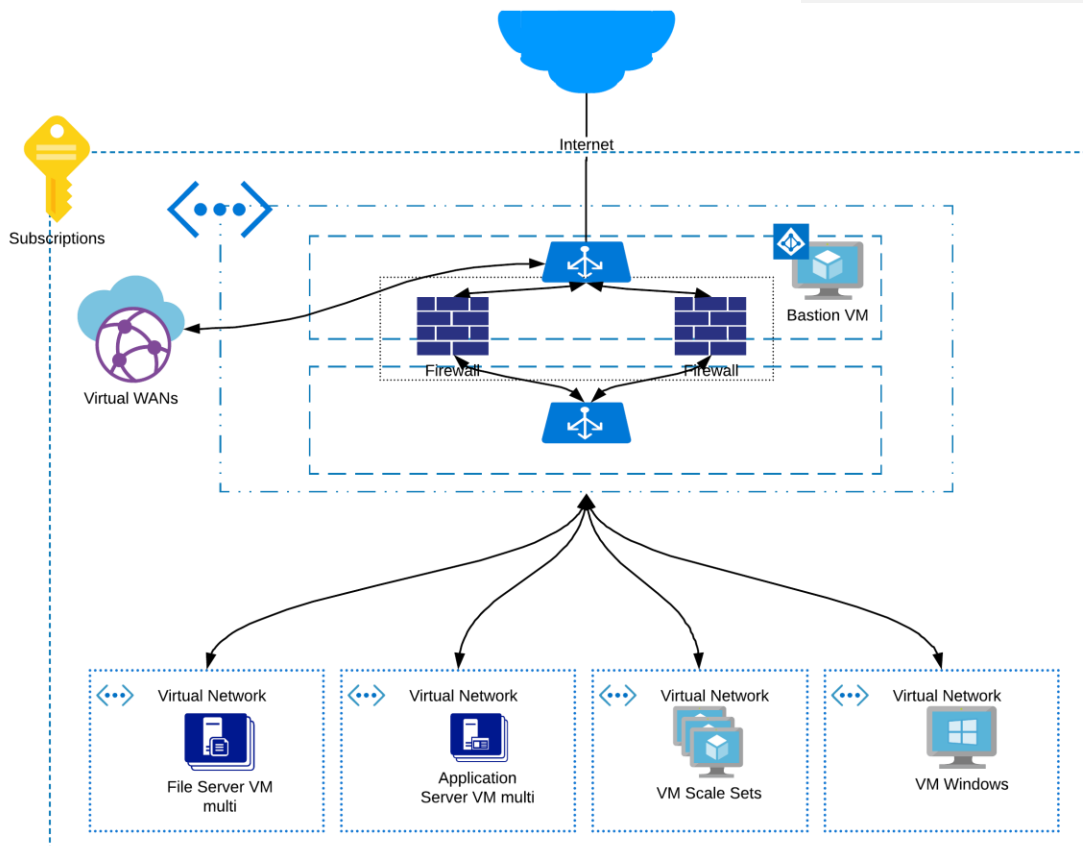

Why Vandis?

A comprehensive network and security strategy that spans your cloud and premise environments has become mission critical for every organization. Vandis' high-level engineering capabilities and close relationships with market leading and niche manufacturers allow us to make timely recommendations. With over 35 years of experience, Vandis has the proven ability to navigate the everchanging technology and business landscape. As projects increase in complexity, we have the necessary resources to successfully manage projects on a regional, national, and global scale.
