

Managed Azure Virtual WAN Powered by Fortinet

A Secure, Low-Latency, and Cost-Saving Solution

Vandis' offering combines Azure Virtual WAN, Fortinet SD-WAN and Vandis Managed Services to improve security, performance, and connectivity between branch sites, the Azure environment, and the internet.

What is Managed Azure Virtual WAN Powered by Fortinet?

Vandis engineers will design and implement an Azure network architecture leveraging Fortinet's Security and Networking Stack specifically designed to accommodate the traffic between premise locations, cloud locations, and the Internet. Vandis Managed Services will provide remote support and 24/7 monitoring of Fortinet devices deployed at all locations with custom alert rules.

Cloud & Branch Next-Generation Security

- NGFW Security for your premise and cloud workloads
- IDS and IPS Protection
- Real-time threat detection and protection

Have your workloads communicate securely

Low Latency, Secure Mesh Communication Fabric

- Optimized SD-WAN
- Full Network & Endpoint Visibility
- Run your organization on one of the largest network backbones in the world

Have your workloads communicate quickly

Why customers use Managed Virtual WAN Powered by Fortinet

- Reduce or eliminate MPLS costs across branch sites
- Lower end-user latency
- Centralized management of security rule sets across hybrid environment
- Faster VPN connectivity
- Better visibility and a single pane of glass to view network and identify security risks

Vandis Managed Services and Ongoing Support

- Zero Touch Provisioning
- Expertise Managing Complex, Enterprise Networks
- 24/7 Monitoring & Support

Customized managed services provide ongoing optimizations

"We're actually looking at not getting a second data center and leveraging Azure all together for that space, and I give credit to Vandis solely in guiding us in that direction ... Down the road and in the future, I can envision a complete Azure solution and not have a data center at all."

- John Tabako, Director of IT Infrastructure, PM Pediatrics

How Vandis' Managed Virtual WAN Powered by Fortinet works to benefit your business

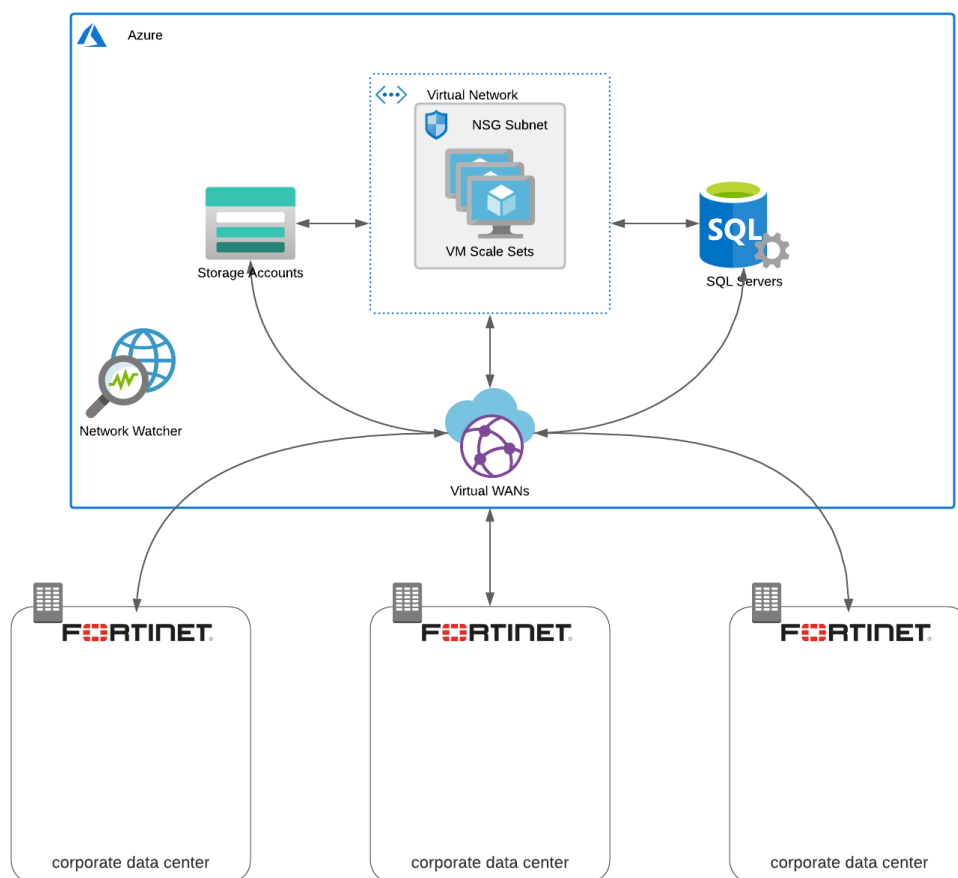

- Clients have often seen savings compared to traditional network environment
- Cloud adoption has been accelerated for customers using the solution
- Better visibility throughout the hybrid environment
- Simple control of RBAC and permissions through Azure Lighthouse
- A true managed hybrid cloud network model

Managed Virtual WAN Powered by Fortinet

Our promise to you

That we can build and monitor your SD-WAN environment, customized to your business needs

Why Vandis?

A comprehensive network and security strategy that spans your cloud and premise environments is mission critical for your organization. Vandis' high-level engineering capabilities and close relationships with market leading and niche manufacturers allow us to make timely recommendations. With 40 years of experience, Vandis has the proven ability to navigate today's everchanging technology and business landscape and the resources and expertise to successfully manage projects on a regional, national, and global scale.
