VANDIS

Managed Virtual WAN Powered by Barracuda CloudGen WAN

A Secure, Low-Latency, and Cost-Saving Solution

Offering combines Vandis Managed Services, Barracuda CloudGen WAN, and Azure Virtual WAN to deliver secure connectivity between branch sites, datacenters, and multi-cloud environments

Managed Virtual WAN Powered by Barracuda CloudGen WAN

Vandis engineers will design and implement the Azure network architecture leveraging Barracuda's CloudGen WAN solution to securely accommodate traffic between premise locations, cloud locations, and the Internet. After implementation, Vandis' MSP team will provide remote support and 24/7 monitoring of Barracuda's solution and Microsoft Virtual WAN with custom alert notifications.

Why customers use Managed Virtual WAN Powered by Barracuda

- Better network performance and lower end-user latency

- Centralized management of security rule sets across hybrid environment

- Reduce or eliminate high MPLS costs across branch sites

- 24/7 monitoring and remote support

Low Latency, Secure Mesh Communication Fabric

- Optimize user experience for cloud and SaaS applications

- Route your traffic based upon custom SLAs

- Run your organization on one of the largest network backbones in the world

Decrease latency across your critical workloads

Cloud & Branch Next-Generation Security

- Includes NGFW Security for premise and cloud workloads

- Full protection with automated rule deployment for branches that lack security

- Content filtering to enforce access regulations

Protect against data breach and downtime

Vandis Managed Services and Ongoing Support

- Secure deployment of Barracuda CloudGen WAN

- Expertise managing complex, enterprise networks

- 24/7 Monitoring & Support

Customized managed services provide ongoing optimizations

"This innovative solution will enable our clients to change the way they connect multiple remote locations between each other and their cloud environment. With our engineering team's experience and close working relationship with Barracuda, we will help clients redefine their networks."

- Ryan Young, CTO, Vandis Inc.

# How Managed Virtual WAN Powered by Barracuda CloudGen WAN works to benefit your business

- Clients have often seen savings compared to traditional network environment
- Accelerated cloud adoption
- Improved network and security visibility across hybrid cloud environment
- Simple control of RBAC and permissions through Azure Lighthouse
- A true managed hybrid cloud network model

Managed Virtual WAN Powered by Barracuda

Our promise to you

To implement and monitor a secure, efficient SD-WAN solution that is customized to your business needs
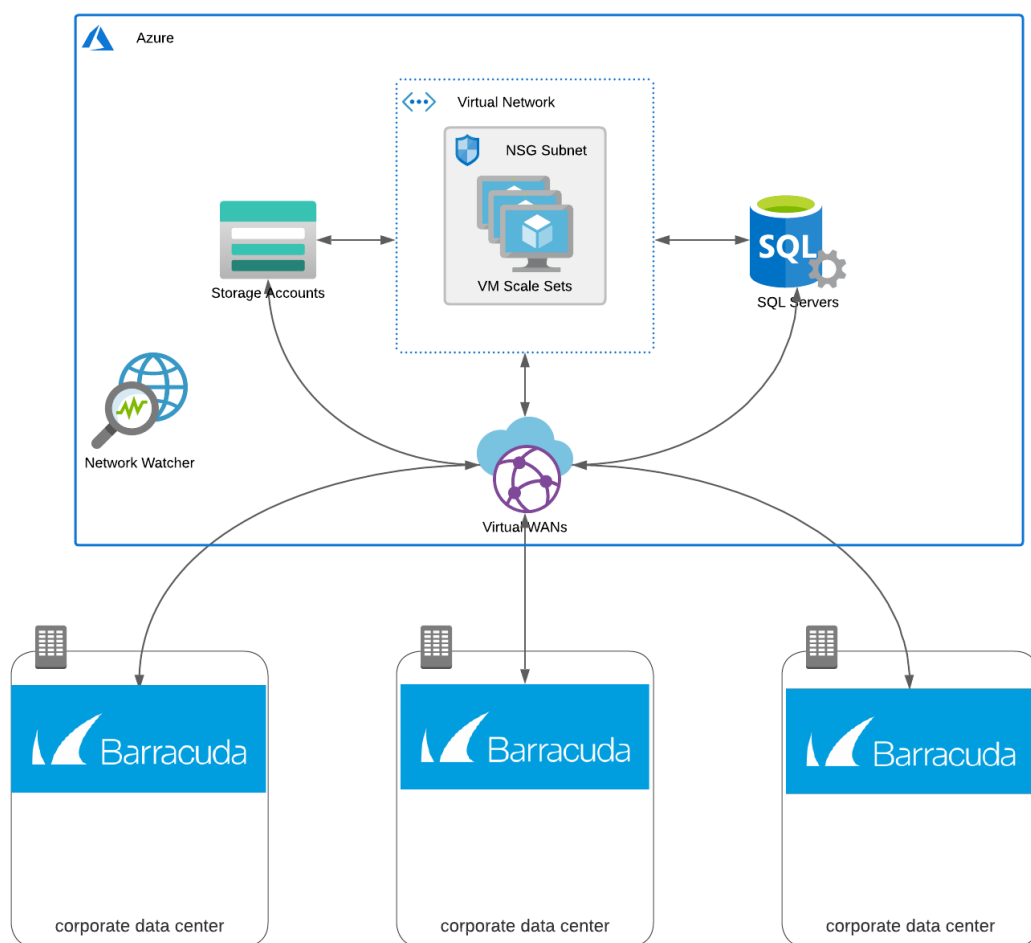

Why Vandis?

A comprehensive network and security strategy that spans your cloud and premise environments is mission critical for your organization. Vandis' high-level engineering capabilities and close relationships with market leading and niche manufacturers allow us to make timely recommendations. With 40 years of experience, Vandis has the proven ability to navigate today's everchanging technology and business landscape and the resources and expertise to successfully manage projects on a regional, national, and global scale.
