VANDIS

Network as a Service

With Vandis' Network as a Service (NaaS) solutions, you can operate your network efficiently without having to internally maintain your network infrastructure. Maintaining internal networks require regular maintenance and upgrades to aging hardware. NaaS lets you consume and outsource the full lifecycle of your enterprise network deployment, with all hardware, software, licenses, and services delivered in a flexible consumption or subscription-based offering. When you partner with Vandis, you can expect a NaaS solution designed to fit the unique needs of your organization.

How we work with our clients:

Review & Assess — Vandis will thoroughly review your current environment and work with you to determine your business network security and connectivity requirements.

Design & Architect — We'll deliver a unique on-prem and cloud-based infrastructure, whether completely replacing or utilizing a blend of existing and new technology.

Deploy & Implement — You can expect a scalable, forward-looking infrastructure that aligns with your business objectives.

Managed Services — We offer services to manage your network, including monitoring, reporting, and role-based access. We also offer Life Cycle Management, including daily operations, maintenance, support, patching, and technology refreshes.

Turnkey NaaS Solution

Achieve your network capabilities without having to own, build or maintain your network. NaaS lets you more easily scale up or down, rapidly deploy new services, and optimize your IT budget.

"Vandis has guided The Masters School for many years, and they have always done right by us. I trust them. They have fantastic, knowledgeable engineers on staff and always respond to us in a timely manner."

VANDIS

Our NaaS Offerings

Next Generation Firewalls (NGFWs). Your firewall solution can be delivered as a service, giving you the ability to quickly and more easily scale an expanding network. The solution can be designed to the size, configuration, and security needs unique to your organization.

Switches and Wireless Devices. Deploy switches and wireless resources in a flexible consumption- or subscription-based model. Extend the range of your network and WiFi coverage to support IoT and BYOD resources, with the assurance that your network is managed, monitored, and protected.

SD-WAN. Improve network performance, reduce latency challenges and ensure reliable connectivity. Get the benefits of having the latest functionality with easy upgradability via the cloud. Pay for the features you use and have the agility to increase or decrease the levels of functionality.

Leading-edge Technology

We offer the latest enterprise technology solutions from both market leading and niche solution providers. Our recommendations are based on how to best optimize your network infrastructure to ensure your budget, security, and performance requirements are met.

Key NaaS Partners

FORTINET® HPE

Why Customers Choose NaaS

- Financial Flexibility: NaaS can reduce IT infrastructure costs related to hardware, software, operations and maintenance and is provided as a predictable recurring operating expense.
- Proactive Maintenance: Ongoing monitoring and maintenance helps detect and predict network issues to prevent outages.
- Enhanced Security: Vandis can work with you to implement security best practices and deliver faster deployment of new features and functions to enhance security.
- Improved Service Quality with SLAs: Obtain a guaranteed level of availability, network uptime, response and resolution times for addressing issues.
- Managed Services Augment IT Resources: With access to highly skilled networking experts, Vandis can manage your network, so your IT teams can focus on other strategic projects.

Why Vandis?

A comprehensive network and security strategy that spans your cloud and premise environments is mission critical for your organization. Vandis' high-level engineering capabilities and close relationships with market leading and niche manufacturers allow us to make timely recommendations. With 40 years of experience, Vandis has the proven ability to navigate today's everchanging technology and business landscape and the resources and expertise to successfully manage projects on a regional, national, and global scale. **To learn more about Vandis' NaaS solution offerings and our professional and managed services, contact us at info@vandis.com.**
